**Reward-it**

**CardPresso: Selecting correct SQLite settings  
for new project**

**Reward-It Ltd**

Follow these steps and select these settings when connecting cardPresso to an SQLite database;

Open cardPresso

Click Database > Connect

From the drop down menu select:

**SQLite Version 3**

**Click Next**

Click Browse for \*.sqlite

Choose Internal Database sqlite

Click Operation > Create Table

Name table (With a new project name)

+ Add Field - Add fields needed for the project

Click Next

Click Finish

Fields should now display within the tabs on the right and the card design can be created or fields linked to items on the card design.
